

Hormones 101: Testing, and addressing hormone imbalance with a functional approach, and The New Hormone on the Block Oxytocin

Learning Objectives:

Upon successful completion of this knowledge-based course pharmacists should be able to:

1. Review the role of endogenous female hormones and their physiological function.
2. Review daily production of various female hormones at various stages of the menstrual cycle.
3. Review appropriate dosing of hormone replacement and best routes of administration.
4. Review the pros and cons of various testing methodologies for hormone management.
5. Explain how neuropeptides influence epigenetic presentation.
6. Describe the interconnection between sex hormones and neuropeptides.
7. Analyze Oxytocin's effect on the GI and other smooth muscle systems.
8. Develop additional scientifically supported applications for neurohormone therapies.
